- v. Signs and lighting; and
- vi. Potential nuisances.

SECTION V: LAND USE STANDARDS

SECTION USERS GUIDE: This section contains general performance standards with which all new development proposals submitted for approval pursuant to this Ordinance must comply. The purpose of the regulations contained in this section is to allow maximum utilization of land while protecting against adverse impacts on the environment, neighboring properties, and the public interest. This assurance is provided by separating the areas of the Town of Searsport into districts and permitting specific land uses within each, provided that a use meets all the additional criteria specified in this Ordinance. This regulatory approach has been termed "performance zoning" because it permits a use to be developed on a particular parcel only if the use on that parcel meets "performance standards".

The following Land Use Standards shall govern all Land Use Permits issued by the Code Enforcement Officer and the Planning Board. In reviewing applications submitted pursuant to this Ordinance, the Code Enforcement Officer or the Planning Board shall consider the following performance standards and make written findings that each applicable standard has been met prior to issuing final approval. In all instances, the burden of proof shall be upon the applicant.

A. GENERAL PERFORMANCE STANDARDS

The following provisions shall apply to all permitted uses, and failure to comply with any of these standards shall be considered a violation of this Ordinance:

1. **Danger** - No material which is dangerous due to explosion, extreme fire hazard, chemical hazard or radioactivity shall be used, stored, manufactured, processed or assembled except in accordance with applicable State and Federal codes and regulations.
2. **Vibration** - With the exception of vibration necessarily involved in the construction or demolition of buildings, no unreasonable vibration shall be transmitted outside the lot where it originates.
3. **Wastes** - No offensive wastes shall be discharged or dumped into any river, stream, watercourse, storm drain, pond, lake, or swamp. Industrial wastewater may be discharged to municipal sewers only and in such quantities and quality as to be compatible with existing municipal facilities as proscribed by the Wastewater Superintendent.
4. **Noise** – The level of sound, inherently and recurrently generated from industrial or commercial facilities shall not exceed 70 dBA between 7:00 a.m. and 7:00 p.m. (the "daytime hourly limit"), and 60 dBA between 7:00 p.m. and 7:00 a.m. (the 'nighttime hourly limit') at or within the boundaries of any lot used for a residential purpose, except for sound from construction activities, sound from traffic on public streets, sound from temporary activities, and sound created as a result of, or relating to, an emergency, including sound from emergency warning signal devices.

In addition to the sound level standards otherwise established, commercial or industrial facilities or operations shall employ best practicable sound abatement techniques to prevent tonal sounds and impulse sounds or, if such tonal and impulse sounds cannot be prevented, to minimize the impact of such sounds in residential zones. Tonal sound is defined as a sound wave usually perceived as a Hum or which because its instantaneous sound pressure varies essentially as a simple sinusoidal function of

time. Impulse sounds are defined as sound events characterized by brief excursions of sound pressure, each with a duration of less than one (1) second.

Determination of noise violation: A noise violation shall be considered to exist when the Code Enforcement Officer or their designee is able to confirm the complaint from the same residential lot within two (2) separate twenty-four-hour periods. The Code Enforcement Officer shall only respond to a complainant who confirms that the noise is detectable at the time of the actual complaint. In order to confirm a complaint, the Code Enforcement Officer or their designee shall first determine that a noise is detectable in the area of the complaint. The Code Enforcement Officer or their designee shall interview the complainant to verify that the detectable noise is in fact the noise that resulted in the complaint. If the complainant verifies the noise as the source of the complaint, then the Code Enforcement Officer shall notify the owner or operator of the alleged noise source either in person or by telephone within one (1) working day, with a written confirmation within seven (7) working days of the complaint. The Code Enforcement Officer shall work with the operator of the alleged noise source to identify the source of the noise and any means by which the noise may be reduced to an acceptable level. If such informal means do not remedy the violation, the Code Enforcement Officer may, in his or her discretion, issue a Notice of Violation in accordance with this Ordinance.

5. Lighting - All exterior lighting shall minimize adverse impact on neighboring properties.

6. Odor Nuisance - Purpose. The Town finds that because most odorous pollutants have a complex chemical composition and may elicit a broad spectrum of responses by the receptors, special methods must be employed in their measurement and characterization. Although analytical data are more precise and may be useful in identifying a source, it is the human response or the sensory data that is most critical in determining the necessary degree of odor control. Analytical data may be used to specify permissible emission levels from a source, but sensory data must be employed to assess the impact in the surrounding community. The latter is the Town's primary concern.

- a. Objectionable Odor Determination. An odor will be deemed objectionable and is a public nuisance when any of the following occurs:
 - a) Creates a public nuisance at common law; or
 - b) The erection, continuance or use of any building or place for the exercise of trade, employment or manufacture which, by noxious exhalations or offensive smells, become injurious and dangerous to the health, comfort or property of individuals or the public; or
 - c) An officer from the Searsport Police Department shall assist the Code Enforcement Officer in investigating complaints and determine, through personal observation, that the odor at the property line of the source based on Town Tax Maps or elsewhere in the Town is objectionable, taking into account its nature, concentration, location, and duration and are able to identify the source.

- d) Odor caused by use of other than best management practices applicable to said commercial activity for any commercial property.
- b. Compliance. No odor source, land use, facility, or activity shall be exempt from complying with the odor management standards contained in this Ordinance. The odor standards apply to all existing and future odor sources, land uses, facilities and activities in the Town, except as otherwise provided herein.
- c. Observation Procedures. Odor observation shall be undertaken to arrive at a determination that an objectionable odor exists shall be at or beyond the property line or at or near places where people live or work.
- d. Enforcement. In the event that the Code Enforcement Officer or Searsport Police Department receives complaints that smells or odors are detectable beyond the property line, the following process shall be used to correct the odor problem:
 - a) Commercial property.
 - 1) Within three (3) business days of receiving a complaint, the Code Enforcement Officer shall investigate the property to assess the situation and discuss odor compliance with the business operator, including but not limited to asking the business operator what is being done to mitigate odors. If the Code Enforcement Officer detects odor beyond the property lines, the Code Enforcement Department shall provide verbal notice of violation to the business operator and instructions to comply with odor management provisions of this Ordinance. The Code Enforcement Officer shall require the business operator to be in conformance of this Ordinance within five (5) business days.
 - 2) If after five (5) business days the complaints persist and/or the Code Enforcement Officer continues to observe an odor issue, the Code Enforcement Officer shall request the assistance of a law enforcement officer to investigate the complaints. If the Code Enforcement Officer and the law enforcement officer observe odor issues as described above, the Code Enforcement Officer shall notify the business operator of the violation in writing and require notification of conformance within ten (10) business days.
 - 3) If complaints persist and the Code Enforcement Officer or the Police Department continue to observe odor issues after the ten (10) business day period as described above, the Code Enforcement Officer shall provide a second written notice of violation and require the business operator to submit a written report from a mechanical engineer with recommendations for modification/improvement of the ventilation system within thirty (30) days and installation of recommendations and notice of compliance within forty-five (45) days.
 - 4) If the business operator has not submitted the required report within thirty (30) days, or if the business operator has not submitted evidence of compliance within forty-five

(45) days as described above, the Code Enforcement Officer shall provide a third and final written notice of violation and turn the matter over to the Town Attorney.

- 5) If the business operator has not submitted the required report within thirty (30) days as described above or if the business operator has not submitted evidence of compliance within forty-five (45) days, the Selectmen may temporarily suspend any license or permit after notice and a public hearing.
- 6) If the business operator has not submitted the required report and evidence of compliance within ninety (90) days, the Selectmen may permanently revoke any municipal license or permit, after notice and a public hearing, and impose penalties pursuant to Section f. set forth herein.

b) Residential property.

- 1) Within three (3) business days of receiving a complaint, the Code Enforcement Officer shall investigate the property to assess the situation and discuss odor compliance with the residential property owner or renter. If the Code Enforcement Officer detects odor beyond the property lines, the Code Enforcement Department shall provide verbal notice of violation to the residential property owner or renter and instructions to comply with odor management provisions of this Ordinance. The Code Enforcement Officer shall require the residential property owner or renter to be in conformance of this Ordinance within five (5) business days.
- 2) If after five (5) business days the complaints persist and/or the Code Enforcement Officer continues to observe an odor issue, the Code Enforcement Officer shall request the assistance of a law enforcement officer to investigate the complaint. If the Code Enforcement Officer and the law enforcement officer observe odor issues as described above, the Code Enforcement Officer shall notify the residential property owner or renter of the violation in writing and require within ten (10) business days evidence, that affirmatively demonstrates, that the applicant has made adequate provision for the control of odors and is in conformance with this Ordinance.
- 3) If after ten (10) days the residential property owner or renter is not in conformance as described above the Selectmen, after notice and a public hearing, may impose penalties pursuant to Section f set forth herein.

Such person or persons need not be residents of the Town and may, by authorized prearrangement with the Planning Board, the Historic Preservation Commission or Code Enforcement Officer and Selectmen, receive compensation. Such findings shall be advisory to the Code Enforcement Officer or Planning Board, which shall make final determinations and may place reasonable conditions related to these standards.

6. The surface cleaning of structures shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall be avoided when possible.

G. Planning Board and Historic Preservation Commission Approval Needed

H. Public Hearing

A hearing on the application will be conducted on the application as outlined in Section VII D4.

I. Standards of Evaluation

The standards and requirements contained in this section and the Secretary of the Interior's Standards for Rehabilitation (1990 Edition) and the Secretary of the Interior's Standards for the Treatment of Historic Properties (1995 Edition) shall be used in review of applications.

1. Construction of new buildings and structures in historic district. The construction of a new building or structure within an historic district shall be generally of such design, form, proportion, mass, configuration, building material, texture, color and location on a lot as will be compatible with other buildings in the historic district and with streets and open spaces to which it is visually related and in keeping with the area.
2. Visual compatibility factors for new construction and additions. Within historic districts, historic sites or historic landmarks, all new construction and all new additions shall be visually related generally in terms of the following factors:
 - a. Height. The height of proposed buildings shall be compatible with adjacent buildings.
 - b. Proportion of building's front facade. The relationship of the width of the building to the height of the front elevation shall be visually compatible with buildings, structures and open spaces where it is visually related.
 - c. Proportion of openings within the facade. The relationship of the width of the windows to the height of windows and doors in a building shall be visually compatible with that of windows and doors of buildings to which the building is visually related.

- h. Roof shapes. The roof shape of a building shall be visually compatible with that of the buildings to which it is visually related.
 - i. Scale of building. The size of the building, the building mass of a building in relation to open spaces, the windows, door openings, porches and balconies shall be visually compatible with those characteristics of buildings and spaces to which it is visually related.
 - j. Directional expression of front elevation. A building shall be visually compatible with the building, squares and places to which it is visually related in its directional character, whether this shall be vertical character, horizontal character or nondirectional character.
3. Standards for renovations, alterations and repairs of existing buildings, structures and appurtenances thereof.
- a. Within historic districts, historic sites and historic landmarks, the Board and Commission shall use the standards listed below in the evaluation of an application for all renovations, alterations and repairs of existing buildings, structures and appurtenances thereof:
 - 1) Every reasonable effort shall be made to provide a compatible use which will require minimum alteration to the structure and its environment.
 - 2) Rehabilitation work shall not destroy the distinguishing qualities nor character of the structure and its environment. The removal or alteration of any historic material or architectural features should be held to a minimum.
 - 3) Deteriorated architectural features should be repaired rather than replaced, wherever possible. In the event that replacement is necessary, the new material should match the material being replaced in composition, design, texture and other visual qualities. Repair or replacement of missing architectural features should be based on physical or pictorial evidence rather than on conjectural designs or the availability of different architectural features from other buildings.
 - 4) Distinctive stylistic features or examples of skilled craftsmanship which characterize historic structures and often predate the mass production of building materials shall be treated with sensitivity.
 - 5) Changes which may have taken place in the course of time are evidence of the history and development of the structure and its environment, and these changes shall be recognized and respected.

 - 7) Contemporary design for additions to existing structures shall be encouraged if such design is compatible with the size, scale, material and character of the neighborhood, structures or its environment.
 - 8) Wherever possible, new additions or alterations to structures shall be done in such a manner that if they were to be removed in the future the essential form and integrity of the original structure would be unimpaired.
 - b. In determining compliance with these standards, the Board and Commission shall be guided, although not bound, by the Guidelines for Applying the Secretary of

J. Exceptional Circumstances.

The Board and Commission may approve an application where the standards otherwise set forth in this section are not met but where the Board or Commission determines that failure to approve the application would result in undue hardship to the owner of the property. Before the Board or Commission may issue a Certificate of Appropriateness under this subsection, the records must show the following:

The property cannot yield a reasonable economic return or the owner cannot make any reasonable use of the property. Reasonable economic return shall not be construed to mean a maximum return, and any reasonable use shall not be construed to mean the highest and best use.

- a. Ordinary maintenance permitted; public safety.

Ordinary maintenance permitted. Nothing in this section shall be construed to prevent the ordinary maintenance or repair of any exterior feature in an historic district or of any historic landmark which does not involve a change in the design, material or outer appearance thereof.

- b. Safety. Nothing in this section shall prevent the construction, reconstruction, alteration, restoration or demolition of any feature which the Code Enforcement Officer shall certify is required by the public safety because of an unsafe or dangerous condition.

K. Demolition Delay

Purpose: While the Demolition Delay cannot and does not prohibit anyone from demolishing or altering historically significant or sensitive homes, it does at least give the town and the Searsport Historic Preservation Commission (HPC) the chance to preserve the architectural and historical features as a record for the future. This section is presented in furtherance of the policy set forth in the Growth Management Act, the Maine State goal, to preserve the State's historic and archaeological resources, and the Searsport Comprehensive Plan.

No applications for the act of demolition as allowed by a building permit or demolition permit for a structure 50 years or older shall be approved by the Code Enforcement Officer (CEO) until the Historic Preservation Commission (HPC) makes a determination as to its historic or architectural significance, and has the opportunity to pursue alternatives to demolition that will preserve, rehabilitate, or restore it or properly record it. Alternatives must be mutually agreeable to the Committee and the applicant. The Demolition Delay shall apply to all structures in the Town, not limited to those previously landmarked or included in a Historic District or on the National Register.

1. Upon receiving a request to demolish a structure 50 years old or older, the CEO shall date the application and promptly forward a copy of the application to the Chairman of the HPC.
2. The HPC will conduct a Public Hearing within 60 days of the HPC's receipt of the applicant's request to demolish, unless an extension is agreed to by both the Committee and the applicant. The purpose of the Public Hearing shall be to determine whether the structure is of sufficient historical or architectural significance for the HPC to pursue alternatives to demolition. Written notice of the public hearing shall be given by first class mail to the applicant and to owners of abutting properties of the applicant's lot at least 7 days prior to the hearing date. The CEO and any consultants or professional advisors of the HPC shall also be notified. The HPC shall post the meeting notice in the Town Hall and publish notice of the date, time, and place of the hearing in a newspaper of general circulation in Searsport at least 7 days prior to the Hearing.
3. Should the HPC make a determination of historical or architectural significance, they shall seek alternatives to demolition. The period for pursuing alternatives to demolition shall not be more than 60 days beyond the determination of significance, or a total of 120 days from the date of the HPC's receipt of request for demolition, unless an extension is agreed to by both the HPC and the applicant.
4. There shall be a notice posted of intent to demolish visible on the property throughout the period of HPC review in order to encourage public awareness and input into the review process.
5. Following the Public Hearing, and at the same meeting, the HPC shall determine if the building or structure, or the portion of the building or structure to be demolished is significant enough to warrant pursuit of alternatives to demolition. The following actions may be taken following the Public Hearing:
 - a. If it is determined to be not significant, the HPC shall transmit this decision to the CEO, who shall be authorized to issue the permit to demolish immediately.
 - b. If it is determined to be significant, the HPC shall transmit this decision to the CEO, who shall be prohibited from issuing the permit to demolish until the 120-day delay is fulfilled. Criteria for determining structure significance shall be based upon one or more of the following:
 - i. Structures or archaeological sites at which events occur or have occurred that contribute to and are identified with or significantly represent or exemplify the broad cultural, political, economic, military, social, or sociological history of Searsport or nation.
 - ii. Structures or archaeological sites associated with Town historic personages, great ideas or ideals.
 - iii. Structures or archaeological sites on or eligible for listing on the National Register of Historic Places or in the Local Historic District.

- iv. Structures or archaeological sites embodying examples of architectural types or specimens valuable for study of a period, style, or method of building construction.
- c. Failure to make a determination of significance within 60 days shall also constitute HPC approval of the application for demolition.
- 6. Any alternative to structure demolition must be mutually agreed upon in writing by the applicant and the HPC.
- 7. The HPC shall be authorized to obtain photographic or professional documentation of a structure determined to be significant at no expense to the applicant.
- 8. In the event a structure is demolished before the review process is completed, no building permits shall be issued to the applicant, for construction on the lot the demolished building occupied for a period of 2 years. Any permits current for the applicant shall be revoked.
- 9. In the event a structure is deemed a danger to life or property by the CEO, the CEO may allow demolition before the review deadline.
- 10. Waivers. The HPC may, upon the applicant's request, waive any part of the 120-day delay period procedures. Such action shall be taken only upon:
 - a. A finding of the HPC that the strict application of the demolition delay provisions to the applicant and his property would cause undue hardship that could not be reasonably avoided. Undue hardship shall not include mere inconveniences or incidental financial loss;
 - b. The HPC finds that the goals and objectives of the demolition delay can be achieved in less than (120) days.
- 11. All demolition work shall be completed within thirty days of permit issuance. When circumstances beyond the permittee's control prevent completion of the work, the permittee may request an extension in writing to the CEO prior to expiration of the permit. Requests for extension must indicate why additional time is necessary to complete the work.
- 12. A demo delay decision by the HPC is not transferrable to a new owner of the property. If the property is sold during the demo delay period, then the demo delay will restart at the date of closing. Once a demo delay has expired, but before a demolition permit is issued by the CEO, and the property is sold to a new owner, the demo delay application process begins again.
- 13. Appeals. Any action of the Historic Preservation Commission may be appealed in writing directly to the Board of Appeals, by the affected party.

L. Solar Energy Systems

Solar energy system installations proposed for properties located within a historic district, historic site or historic landmark must receive a certificate of appropriateness ("COA") from

the Historic Preservation Commission. The HPC may issue a COA for a Solar Energy System installation that meets the criteria specified herein as permitted within the underlying zoning district.

1. Criteria for Certificate of Appropriateness --General:
 - a. Solar Energy System should be sited so they will not substantially alter, obscure, or add to the exterior features of the historic resource or visually intrude on the overall historic character of the historic resource.
 - b. Solar Energy System should, if possible, be installed on new additions or non-historic structures on the site.
 - c. Multiple placement options and site locations should be considered for Solar Energy System installation(s) including using a ground-mounted system instead of a roof-mounted, building integrated or building-mounted system.
2. Criteria for Certificate of Appropriateness--Specific Types of Solar Energy
 - a. For Ground-Mounted Solar Energy Systems: a. Solar Energy Systems shall be installed in a location that is not highly visible from public streets, and screening may be required to further limit visibility.
 - b. Solar Energy Systems shall not detract from any character defining features of the site, which may include both natural and designed features.
3. For Building-Integrated Solar Energy Systems:
 - a. Solar Energy Systems shall be unobtrusive and shall not impair the historic integrity of a building by removing, altering, or obscuring historically significant architectural features of the building or adding historically contrasting features to the building.
 - b. Solar Energy Systems shall not be highly visible from a public street, or if visible, the system shall not be distinguishable from the building.
3. For building mounted photovoltaic and roof-mounted Solar Energy Systems:
 - a. Solar Energy Systems shall be unobtrusive and shall not impair the historic integrity of the building by removing, altering, or obscuring historically significant architectural features of the building or adding historically contrasting features to the building.
 - b. Roof-mounted Solar Energy Systems shall be placed on a non-character-defining roof plane or a non-primary elevation, shall not alter a roof plane or character defining feature such as a dormer or chimney, shall run parallel to the original roof plane, shall not extend more than nine inches above the roof plane, and shall not extend above the roof ridge line.
 - c. Building mounted photovoltaic and roof-mounted Solar Energy Systems shall not contrast with the color of the roof or the building surface on which they are mounted.
 - d. Character defining elements such as historic windows, walls, siding, or shutters which face public streets and contribute to the character of the building shall not be altered, removed, or obscured in connection with the installation of a Solar Energy System
4. The HPC has the discretion to waive any of the above criteria which, if strictly applied would significantly decrease the efficiency, specified performance, or conservation benefits of the proposed Solar Energy System.

M. Administration and Enforcement

1. An Historic Preservation Certificate issued under this Ordinance shall expire if the authorized activity does not commence within one (1) year of the date of issue and if the activity is not completed within two (2) years of said date. The Commission may extend the Certificate for up to one (1) year for good cause.
2. Section VII of this Ordinance shall be administered by the Commission and enforced by the Code Enforcement Officer (CEO).
3. The CEO shall investigate all complaints of alleged violations of this Section, and shall conduct on-site inspections to ensure compliance with all applicable laws and conditions attached to Certificate approvals.
4. The CEO shall keep a complete record of all essential transactions, including applications submitted, Certificates granted or denied, variances granted or denied, revocation actions, violations investigated, violations found, and fees collected.
5. If the CEO finds that any provision of the Section is being violated, the CEO shall notify the person responsible for the violation in writing, indicating the nature of the violation and ordering the action necessary to correct it. A copy of the notice and order shall be submitted to the property owner, the Board of Selectmen and the Searsport Historic Preservation Commission. Any such notice is not a prerequisite to bringing any legal action, and the failure to give notice shall not in any way affect such legal action.
6. The Board of Selectmen, upon notice from the CEO, shall institute any and all actions, and proceedings, either legal or equitable, including seeking injunctions against violators and the imposition of fines that may be appropriate or necessary to enforce the provisions of this Section in the name of the Town of Searsport. The Board of Selectmen, or their authorized agent, is hereby authorized to enter into consent agreements for the purpose of eliminating violations of this Section and assessing fines without Court action. Such agreements should not allow an illegal structure or use to continue unless there is clear and convincing evidence that the illegal structure or use was constructed or conducted as a direct result of verified erroneous advice given by an authorized municipal official and there is no evidence that the owner acted in bad faith.
7. Any person, including but not limited to a landowner, a landowner's agent or a contractor, who orders or conducts any activity in violation of this Section shall be assessed a monetary penalty on a per-day basis in accordance with Title 30-A M.R.S.A., § 4452.
